NEWS YOU CAN FEEL!

## A POWERFUL SOLUTION TO IMPROVE YOUR INDOOR AIR QUALITY

Your home's indoor air can make a big difference to your family's quality of life. Everyone loves a fresh, clean smell, and we're all looking for the better health that comes with reducing mold, bacteria and viruses in a home's air.

If you're tired of pet odors, cigar or cigarette odors, food and cooking odors, or mold and mildew inside your home, consider a powerful, patent-pending technology called the cold plasma air purification device. Harrell King is proud to offer its residential customers this innovative technology from Georgia's own Global Plasma Solutions.

Independent testing shows GPS' cold plasma device kills 99.6 percent of contaminants within 15 minutes.

Numerous customers who have added the device to their comfort systems report that the devices also help control allergens and reduce family members' problems with asthma.

Here's how the device works. Naturally occurring, opposite-charged hydrogen and oxygen ions are treated with enough voltage to produce the cold plasma. When the plasma is added to your comfort system's moving air stream, it travels down the air ducts, disinfecting everywhere the air travels. The plasma helps purify air in three main ways:

- The ions cluster around airborne particles, making the particles large enough for your filters to effectively remove them from

Global Plasma Solutions technology for improving indoor air quality.

Hurry, valid only through June 15, 2016.

## 2016 Thank You Giveaway!

Enter now for your chance to win a free air conditioner

Thank you for making us the #1 Air Conditioning Contractor in Southwest Georgia for the second year in a row!

Feeling lucky? Here's an exciting chance to win a free air conditioner from Harrell King.

Simply fill out a quick and easy form for a chance to win at [HarrellKing.net](http://HarrellKing.net).

Hurry, because time is running out. The final day to enter is April 30.

The AC Giveaway is Harrell King's show of appreciation to all of the good folks, neighbors and valued customers in the community we call home who have helped make Harrell King Southwest Georgia's #1 heating and AC company.

Harrell King is celebrating in a big way by giving one lucky person a free air-conditioning unit. Good luck!

Follow the latest updates on the giveaway by liking Harrell King's Facebook page.

# GEORGIA POWER OFFERS VALUABLE REBATES

Did you know Georgia Power offers several home energy rebates totaling several thousands of dollars for projects ranging from air duct sealing and insulation to programmable thermostats and home energy assessments?

Any new or existing Georgia Power residential customer can take advantage of these valuable incentives to upgrade the energy efficiency of their home.

### *Here are some of the rebates and incentives offered:*

- **Air Duct Sealing:** Get up to a \$400 rebate when you have a Duct and Envelope Tightness Verifier (DET)-certified contractor seal your heating and air duct system.
- **Air Leak Sealing:** Get up to a \$400 rebate when you have a program-participating contractor seal the air leaks in your home.
- **Attic Insulation:** Get up to a \$300 rebate when you insulate your attic with qualifying materials.
- **Home Energy Assessment:** Get up to \$225 in rebates when you have a program-participating contractor conduct a comprehensive energy use assessment of your home.
- **Home Energy Improvement Program: Individual Improvements Approach:** Get up to \$700 in rebates and lower your energy usage by making qualifying individual home improvements.
- **Home Energy Improvement Program—Whole-House Approach:** Get up to \$2,575 in rebates and lower your energy usage up to 30 percent by making qualifying home improvements through a program-participating contractor.
- **Knee Wall Insulation:** Get up to \$150 in rebates when you insulate a knee wall in your home with qualifying materials.
- **Programmable Thermostat:** Get up to a \$100 rebate and up to \$100 in annual energy savings when you install a programmable thermostat.
- **Weatherization Assistance Program:** Provides funding for home improvements to increase energy efficiency for qualifying low-income customers.

Go to [Residential.GeorgiaPower.com/rebates](http://Residential.GeorgiaPower.com/rebates) for details.

## A POWERFUL SOLUTION TO IMPROVE YOUR INDOOR AIR QUALITY

indoor air.

- The ions break down gases and odors into harmless compounds such as oxygen and nitrogen.
- The ions surround pathogens such as viruses, bacteria and mold, robbing the pathogens of the hydrogen they need to survive and rendering them inactive.

More than 30,000 GPS cold plasma air purification devices have been installed in commercial settings including hospitals, restaurants and veterinarians' offices. The devices are small and lightweight enough to fit inside any comfort system. Installation is easy, and the technology requires little maintenance and no replacement parts.

What's more, GPS is 50 percent owned by U.S. military veterans, and its mainly veteran workforce manufactures the devices right here in the United States.

For our spring special, Harrell King is offering 5 percent off Global Plasma Solutions' GPS-2400 model. See the back cover for details, and call today to find out more about how this innovative device can improve your home's indoor air quality.

## Why it's a great time to boost the insulation factor in your home

### 90 percent of U.S. homes are under insulated

Your home's insulation isn't just something to worry about during cold winters. Insulation has plenty of year-round benefits, too.

The right amount of insulation, along with well-sealed windows, doors and other openings, helps save energy and lowers your utility costs, according to EnergyStar, the energy-efficiency program. It also says that proper insulation will better control humidity, reduce noise from outside your home, and reduce the amount of pollen, dust and insects entering your home.

In fact, EnergyStar says most homes in the United States don't have enough insulation. For example, attics with too little insulation often result in drafty rooms, ceilings and walls that are too hot or too cold, and uneven temperatures between rooms.

And the attic is the first place to start if you want to save the most energy. If your attic is accessible and has enough room for you to move, and if you're eager for a do-it-yourself project, check out EnergyStar's website for tips on how to insulate your own attic and on how much to add for homes in our part of the country. (Be sure to check out the tips for sealing major air leaks before you start.) If your attic is a tight squeeze or if you see leaks or other moisture problems up there, you're better off hiring a contractor to tackle the job.

Basements also are good candidates for adding insulation, the better to control temperatures and humidity. Finally, the air ducts that wind their way throughout your home also might need additional insulation, especially where they connect with each other and with the outdoors.

## City of Thomasville provides On-Bill Financing for energy-efficient upgrades

The City of Thomasville offers eligible utility customers low-cost On-Bill Financing for completing energy-efficient upgrades to their homes.

On-Bill Financing allows qualifying homeowners to purchase and install energy-efficient home upgrades such as Energy Star appliances, including qualified central heating and air-conditioning equipment. The program also covers home weatherization services such as installation of insulation, air sealing and caulking, and duct sealing.

Funded by the U.S. Department of Energy through the Georgia Environmental Finances Authority, On-Bill Financing allows the city to collect loan payments through its customers' monthly utility bills. GEFA awarded the city \$200,000 to fund loans to qualifying

customers who wish to purchase energy-efficient appliances and upgrades to their homes.

"Since the program's inception, we have distributed 368 loans to our customers, said Karis Mills, director of customer service. "This means we have enabled our citizens to pump \$1,588,847 into the community during the five years the program has been active."

In addition to requiring only a minimal administrative fee for the loans, customers should experience an offset in project costs immediately through their utility bill due to energy savings.

**For more information about On-Bill Financing, call 229-227-7001.**
